

REACH Declaration of Conformity

25.06.2020

Dear Readers,

The WAREMA Renkhoff Group herewith declares its conformity with the European REACH chemicals directive. We see ourselves as a "downstream user" and are aware of the duties this entails.

Therefore, the recommended risk reduction measures that we receive in the safety data sheets from our suppliers will continue to be integrated in our production process.

We also fulfill our duty toward our suppliers and customers to provide information. We pass on all information on handling hazardous materials that we receive from our suppliers and that is relevant to our customers.

The plastic granulates processed in our Plastic Moulding Department generally are not required to be registered according to the REACH directive.

Moreover, we check the intended use of our formulations against the safety data sheets and contact our suppliers in case of deviations.

In terms of REACH, our products are considered to be manufactured products and substances exceeding one ton are not intentionally released.

If substances of the Approval Candidate List from 25.06.2020 are contained in our products in a mass percentage above 0.1 %, we publish them under the following link on our internet page (warema.com/en/company/reach.php).

All suppliers we queried informed us that they are working on implementing the REACH directive and that they will retain their range of products. Therefore, deliveries to our customers currently are not jeopardized.

If you have any questions, please contact our REACH expert, Mr. Martin Zehner, under +49 9391 20-6030.

Yours sincerely
